Objective

Ansh Sonkusare, a skilled programmer proficient in JavaScript and full-stack development, coding from more than 5 years, seeking internship or remote job opportunities to apply and enhance his coding abilities, offering practical insights and a passion for learning. Available to work as soon as possible

Skills

Frontend Development: JavaScript, TypeScript, Next.js, Tailwind CSS,, CMS

Backend Development: gRPC, REST API, ORM, GraphQL, tRPC

Database: Postgres, MySQL, Firebase, Supabase

DevOps: AWS, DevOps, Docker, NixOS, Networking

Work Experience

Senior Software Developer, XMR.gg

Feb. 2024- present

- Led a team of developers in building full-stack applications using Next.js, MongoDB, Node.js, Express, and React.js.
- Spearheaded the implementation of CI/CD pipelines, reducing deployment time by 50% through Docker integration.
- Optimized workflows that improved team efficiency by 25%, contributing to faster project delivery.
- Designed and implemented user interfaces, backend logic, and database systems, supporting over 100,000 daily active users.
- Improved application performance by 30% through efficient server-side logic and database optimizations.

Front End Intern, Vigo Technoworld pvt ltd

Mar. 2019 - Sept. 2020

- Developed over 20 reusable UI components using HTML, CSS, and JavaScript, reducing future development time by 15%.
- Enhanced page load speed by 25% by optimizing layouts and improving browser compatibility.
- Collaborated with a team of 6 to resolve over 50 issues related to web design and functionality.
- Contributed to a 20% improvement in user experience through the refinement of front-end workflows.

Full Stack Intern, Vigo Technoworld pvt ltd

Sept. 2019 - Jul. 2020

- Developed and maintained full-stack applications using MongoDB, Node.js, Express, and React.js, serving up to 10,000 users per month.
- Designed and implemented 10+ interactive user interfaces, enhancing user engagement by 15%.
- Collaborated with cross-functional teams, leading to a 20% increase in project completion rate.
- Optimized server-side logic, reducing API response time by 35%.

Projects

Ecommerce Website - [Live Demo](#)

Jan. 2024 - Feb 2024

- Leveraged cutting-edge technologies including Next.js, Prisma, tRPC, Vercel, Zustand, and AWS
- Typesafe Code using Typescript on the whole monorepo. Devops for CI/CD using Docker
- Database Management Using Postgres and redis for cache to maximize performance.
- Usage of Clerk as Auth provider and Headless CMS to enhance the Safety and reliability of application.

Spotify Clone

Mar. 2024 - April 2024

- Leveraged cutting-edge technologies including Next.js, Prisma, tRPC, Vercel, Zustand, and AWS
- Implemented audio streaming via ytdl (yt api) for seamless playback.
- Designed responsive UI with Tailwind CSS for optimal user experience.
- Efficient usage of Client Variance Authority and Storybook in order to create a better design system
